#### PRODUCT DATA

## LUBRIPLATE "SFGO ULTRA" SERIES

ISO VISCOSITY GRADES 100, 150, 220, 320, 460, 680 & 1000

\*NSF International H-1 Registered NSF ISO21469 Certification

#### DESCRIPTION

LUBRIPLATE SFGO Ultra Series of synthetic hydrocarbon food grade fluids have been formulated with 100% pure PAO and ester synthetic base fluids. These Polyalphaolefin(PAO) and ester blended synthetic fluids are outstanding lubricants for use under severe conditions subject to extreme high and low temperatures. They exhibit outstanding oxidation resistance, thermal stability, anti-wear protection, and have the extreme pressure capabilities required for industrial gearboxes. These fluids are all zinc-free.

LUBRIPLATE strongly recommends the use of the LUBRIPLATE Oil Analysis Program to monitor performance, improve predictive maintenance and achieve the longest potential oil drain interval. SFGO Ultra Series has the potential to achieve 3 times or more the typical oil drain interval of mineral based oils. Contact your authorized LUBRIPLATE Distributor for more information on the LUBRIPLATE Oil Analysis Program.

#### **APPLICATIONS**

LUBRIPLATE SFGO Ultra Series is recommended for gearboxes, bearings, pumps, compressors, blowers, and chains requiring ISO Viscosity Grades 100 through 1000.

Ferrum Packaging Ltd. has approved SFGO ULTRA-100 for use in their seamer/closing machines.

LUBRIPLATE SFGO Ultra Lubricants are compatible with most mineral base oils including LUBRIPLATE products such as LUBRIPLATE FMO-AW Series and LUBRIPLATE SPO Series. Always consult LUBRIPLATE before changing to an SFGO Ultra fluid from an existing lubricant that may not be compatible with Polyalphaolefin based fluids.

#### **ADVANTAGES**

- ⇒ Excellent thermal stability resulting in longer service life.
- ⇒ Superior oxidation resistance.
- ⇒ Outstanding anti-wear properties providing extended equipment life
- ⇒ Extreme pressure capabilities required for industrial gear boxes.
- ⇒ Exceptional demulsibility characteristics.
- Superb corrosion inhibitor package.
- Naturally high viscosity index and low pour points which ensure optimum performance over a wide operating temperature range.
- ⇒ Superior cleanliness characteristics.
- Excellent compatibility with a variety of elastomers, seals, plastics and paints.

\*Registered H-1 by NSF International for use in food processing facilities as a lubricant or anti-rust agent on equipment in which there may be incidental contact involving the lubricated part and the edible product.

"The LUBRIPLATE SFGO Ultra Series contains no components derived from TSE/BSE relevant animal species; therefore, it is compliant with the requirements of the TSE Note for Guidance EMA/410/01 Rev. 3 July 2011".

Manufactured with ingredients that comply with FDA 21 CFR 178.3570 and FDA 21 CFR 172.882.

#### STORAGE RECOMMENDATIONS

- ⇒ Products should be stored between 40°F-120°F
- ⇒ Products should be stored in a dry covered environment
- ⇒ Products should not be stored in warm, direct sunlight
- Improper storage conditions can significantly alter the shelf life of the product. Such conditions would include temperature, moisture, open containers, etc.
