

LUBRIPLATE® Lubricants Company OEM Department:

Your Source for OEM Lubrication Specifications & Recommendations.

LUBRIPLATE Lubricants has a dedicated OEM Department that is available to support you and your colleagues. Every piece of equipment comes with lubrication specifications and instructions. From chains to air compressors to gear boxes and a lot more, LUBRIPLATE's OEM Department is here to assist with all of your lubrication needs.

Through the development of the LUBRIPLATE OEM Database, we have compiled LUBRIPLATE OEM approvals, many other generic OEM lubrication specifications and instructions as well as specific machinery product application information.

For example, the industry has seen a change when it comes to electric motor bearings. Most major electric motor bearing suppliers, such as SKF, FAG and NSK, are now supplying bearings with a polyurea-thickened grease, as opposed to a lithium-based grease. Polyurea-thickened greases are not compatible with lithium-based greases. LUBRIPLATE Poly HP-2 is a polyurea-thickened grease which meets the specifications of these electric motor bearing suppliers. Also, the leading gear box OEMs are recommending polyalkylene glycol (PAG)-based gear fluids. Our OEM Database has a listing of those manufacturers' specifications and the corresponding LUBRIPLATE PAG gear fluid recommendations.

With 143 years of industrial lubrication experience, LUBRIPLATE is the brand you can trust when it comes to recommending a lubricant to your customers. In addition to our dedicated OEM Department, LUBRIPLATE also offers a complimentary service package to ensure the needs of you and your customers are met.

Please contact Ellen Girard, LUBRIPLATE's OEM Marketing Analyst, to discuss all of your lubrication needs. She can be reached via phone at 973-465-5731 or via email at egirard@lubriplate.com.

LUBRIPLATE® Poly HP-2 -

High Performance Electric Motor Bearing Grease.

- Polyurea-thickened type grease formulated with the highest quality paraffinic base oils available.
- Excellent for high-speed electric motor bearings and other industrial applications.

Available Packaging

35 lb. Pail
120 lb. Quarter Drum
CTN 40 / 14.5 oz. Cartridges

Part Number

L0191-035
L0191-039
L0191-098

Lubriplate Poly HP-2 is Also Available in Perma Automatic Lubricators

LUBRIPLATE® PGO & PGO-FGL Series -

The Next Generation of Ultra High Performance Synthetic Gear Lubricants

- 100% synthetic, polyalkylene glycol (PAG)-based fluids designed for gearboxes, bearings and chains.
- Provide outstanding thermal stability, excellent extreme pressure and anti-wear performance and protection against micropitting.
- Exceed 13 stages of the FZG test.
- PGO-FGL series fluids are NSF H-1 Registered, Food Machinery Grade.
