

# PRECISION INSIGHTS, PROVEN SAVINGS

## LUBRIPLATE'S OIL ANALYSIS PROGRAM

Elevate your plant's reliability and trim downtime with Lubriplate's No-Charge Oil Analysis Program, available for all Lubriplate products. Gain crucial insights into lubricant health, contamination levels, and machinery wear. Take advantage of this invaluable tool to proactively address potential issues, preventing costly breakdowns and enhancing overall operational efficiency.

- **Extend oil drains:** Optimize oil change intervals for enhanced longevity.
- **Reduce annual oil usage:** Efficient management to minimize oil consumption.
- **Improve predictive maintenance capabilities:** Anticipate and address issues before they escalate.
- **Sample bottles, forms & analysis service provided at no charge on all LUBRIPLATE/Fiske oils and fluids:** Hassle-free access to comprehensive analysis.
- **ISO cleanliness testing:** Includes ISO cleanliness testing for hydraulic systems and other potentially approved applications, ensuring the highest standards of oil purity.
- **Third-party independent laboratory:** Reliable and unbiased results.
- **Results provided within 48 hours of lab receiving samples:** Swift access to actionable insights.

The ultimate goal? To generate significant cost savings for your plant. Embrace reliability, reduce downtime, and boost your bottom line with Lubriplate's Oil Analysis Program – your key to on-going, reliable, and sustainable maintenance.

# OIL ANALYSIS PROGRAM: UNVEILED IN FIVE SIMPLE STEPS

Ensure optimum results by completing the steps and form thoroughly, providing specific details about machine components, including brand, model, etc. Always include the Lubriplate product name for accuracy. When pulling samples, ensure they represent the fluid flowing through the machine component, avoiding immediate pulls from drains. For expert guidance, Lubriplate offers training on proper oil sampling techniques and understanding the interpretation of results. Trust us for comprehensive support throughout the oil analysis process.

## Connect with your Dedicated District Manager

Ensure a seamless start by reaching out to your designated Lubriplate representative, providing the names and emails of individuals at your plant who wish to receive comprehensive sample results.

1

## Account Setup with POLARIS Laboratories

Let our Lubriplate representative handle the logistics – they will expertly establish your account with POLARIS Laboratories, ensuring a swift and efficient process.

2

## Secure Your Access – Generate Your User ID & Password

Expect an invitation email for all provided emails, guiding recipients to effortlessly sign in and generate their unique User ID & Password, granting exclusive access to the program.

3

## Obtain Specialized Oil Sample Bottles and Forms

For your convenience, contact your dedicated Lubriplate representative to procure the necessary oil sample bottles and forms, tailored to streamline the collection process.

4

## Rapid Results Delivered with Precision

Experience prompt and accurate results – typically delivered within 48 hours of the laboratory receiving samples. Alternatively, access results conveniently at [www.eoilreports.com](http://www.eoilreports.com) using your personalized User ID & Password for immediate insights into your lubrication performance.
