LUBRIPLATE SYNAC Series products are diester based synthetic compressor fluids formulated to meet a multitude of demanding compressor applications where traditional petroleum based lubricants may not be desirable. These diester based synthetic fluids are outstanding lubricants for applications in which the fluid is subjected to high temperature and high stress conditions over extended drain intervals. The extended drain interval capabilities of LUBRIPLATE SYNAC Series make it a very cost effective solution to your compressor applications.

**APPLICATIONS**

The LUBRIPLATE SYNAC Series are recommended for all types of rotary screw, rotary vane and reciprocating air compressors. They also make excellent lubricants for vacuum pumps and blowers.

**ADVANTAGES**

- Excellent High Temperature Stability and Oxidation Resistance = Extended Lubricant Life
- Very Low Deposit Forming Tendencies = Clean Operation
- Excellent Demulsibility Characteristics = High Separator Efficiency
- High Flash Point and Low Pour Point = Wide Operating Temperature Range
- Outstanding Anti-Wear Protection = Long Bearing and Cylinder Life
- Foam Suppression Properties = Extended Vane and Screw Life
- Corrosion Inhibitors = Excellent Rust Protection

LUBRIPLATE SYNAC Lubricants are compatible with other LUBRIPLATE products such as LUBRIPLATE AC Oils, LUBRIPLATE HO Oils, and LUBRIPLATE SFGO Series Fluids.

**RECOMMENDATIONS**

LUBRIPLATE SYNAC Lubricants are recommended for use with high nitrile Buna-N, Teflon, Viton, Fluorosilicone and polysulfide elastomers.

LUBRIPLATE SYNAC Lubricants are NOT recommended for use with low nitrile Buna-N, neoprene, natural rubber, styrene-butadiene rubber (SBR, Buna-S) or butyl rubber.
