

Simplify Your Maintenance Operations With Lubriplate's Color Coded Lubricant Specification Tags.

As part of Lubriplate's ESP Extra Services Package, Lubriplate offers these color coded machinery tags for all Lubriplate products at no charge. They help prevent lubricant misapplication and ensure that the proper lubricant is used when servicing a particular piece of equipment. Based on a complete plant survey, tags can be provided for each piece of equipment in your plant. Corresponding color coded tags can also be supplied for your lubricant storage containers along with wall mounted lubricant specification charts.

Contact your local Lubriplate representative or call 1-800-733-4755 for more information.

Lubriplate Application Chart
